

PRESS RELEASE:

JK Scanlan Company, Inc. Installs New Photovoltaic System at Home Office

J.K. Scanlan Company, Inc. recently completed the installation of a 23 kilowatt photovoltaic system on their home office at 15 Research Road in Falmouth. The installation, performed by Cotuit Solar, will produce 20% of the electricity used at the office. “The system will continue to produce electricity for decades resulting in substantial economic returns and greatly reducing J.K. Scanlan Company’s dependence on fossil fuels” said Conrad Geysler, Cotuit Solar’s owner.

This installation is part of J.K. Scanlan’s ongoing commitment to renewable energy and energy efficiency improvements in construction practices. The company is including features like this PV system as part of their portfolio of construction offerings. JKS Wind, the firm’s renewable energy design and construction division, was recently awarded contracts to complete the construction of two 1.65 MW wind turbines in Gardner, MA by the Massachusetts Division of Capital Asset Management.

Cotuit Solar has been in business for 21 years and continues to provide sustainability consulting and solutions throughout Massachusetts. For more information please visit their website at www.cotuitsolar.com.

J.K. Scanlan Company Inc. is a Construction Management, General Contracting and Design/Build firm serving a variety of commercial, institutional, health care and private clients throughout the New England area. For additional information please visit their website: www.jkscanlan.com.
